São José dos Campos, 3 de dezembro de 2021

Resumo. Neste relatório, executou-se o ensaio do turbojato SR-30. Foram adquiridas medidas diretas em condições de rotação distintas e, a partir delas, foram calculadas também medidas indiretas. A partir destas, constriu-se os gráficos de Consumo Específico de Combustível e Expuxo tanto medidos quanto calculados em função da Rotação (figuras 14 e 15).
